

FsshioNest E-commerce Website - UI Component Documentation

This document outlines the UI components developed for the FsshioNest e-commerce website. It details the functionality and structure of each component, providing a blueprint for implementation and future development.

1. Product Listing Component:

- Layout: Grid layout of product cards.
- Data: Dynamically rendered from a data source (e.g., API, Sanity CMS).
- Fields:
 - Product Name
 - Price
 - Image
 - Description
- Functionality: Clicking on a product card navigates to the Product Detail Component.

2. Product Detail Component:

- Layout: Dedicated page for each product.
- Data: Dynamically fetched based on the product ID (using Next.js dynamic routing).
- Fields:
 - Product Name
 - Product Description
 - Price
 - Product Images (multiple images possible)
- Functionality: Includes "Add to Cart".

3. Category Component:

- Layout: List or grid of category names.
- Data: Dynamically fetched from the data source.
- Functionality: Clicking on a category filters products in the Product Listing Component.

4. Search Bar:

- Layout: Text input field with a search button (or live search functionality).

5. Cart Component:

- Layout: Displays a list of added items.
- Data: Managed using state management (e.g., Redux).
- Fields:

- Product Image
- Product Name
- Quantity
- Price
- Total Price
- Functionality: Allows users to adjust quantities, remove items, and proceed to checkout.

6. Checkout Flow Component:

- Layout: Single-step form.
- Steps:
 - Billing Address
 - Shipping Address
 - Payment Details (mock implementation initially)
- Functionality: Guides the user through the checkout process.

7. User Profile Component:

- Layout: Displays user information.
- Data: Fetched from user authentication system.
- Fields:
 - Name
 - Email
 - Saved Addresses
 - Order History (with links to individual orders)

8. Related Products Component:

- Layout: Displays a list of related products.
- Data: Fetched based on product tags, categories, or customer behavior.
- Functionality: Suggests similar or complementary products.

9. Footer and Header Components:

- Layout: Consistent across all pages.
- Content:
 - Navigation links (Home, About, Contact, etc.)
 - Branding elements (site name)
 - Copyright information

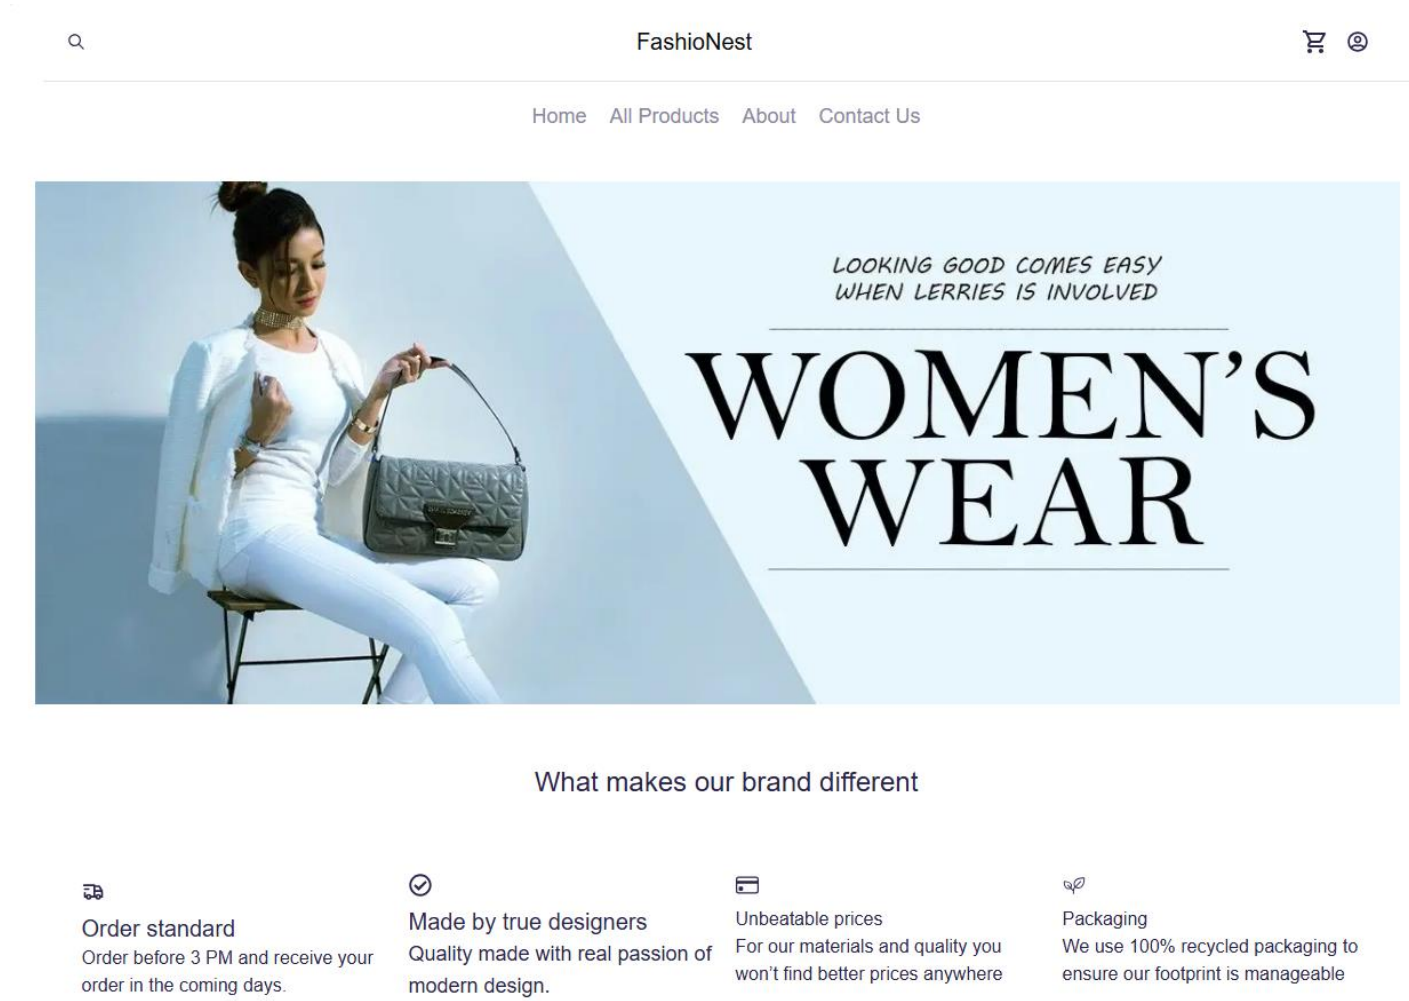

- Responsiveness and Accessibility: Ensured for all devices.

10. Notifications Component:

- Layout: Toast notifications or modal windows.
- Functionality: Displays real-time alerts (e.g., "Added to Cart," errors, successful purchases).

11. Product Comparison Component:

- Layout: Displays selected products side-by-side.
- Functionality: Allows users to compare product details (price, features, ratings).
